

## I-105 ExpressLanes Project

### Extended Freeway Lane Closures Near Western Av – Rail Coordination

March 2026

**Summary:** Metro has a plan to ease traffic and enhance safety on the I-105, which includes the conversion of the existing High Occupancy Vehicle (HOV) lane, or carpool lane, into two Metro ExpressLanes in each direction on the I-105. Major construction for the first phase of the project, Segment 1 between Sepulveda Bl and Central Av, started in early 2025 and is anticipated to be completed in year 2028.

As part of these improvements, crews will be performing work activities along the westbound I-105 freeway related to adjustments to electrical power services for the Metro C Line. This work requires coordination with the Metro C Line rail system so crews can safely work near the median of the freeway. These activities support the overall improvements delivered by the project and accommodate the new ExpressLanes.

**Work Hours and Location:** Please note that work schedules are subject to change based on the progress of work and weather conditions.

- Friday, March 27 at 11:00 PM to Sunday, March 29 at 3:00 AM.

#### What to Expect:

- The closure of two freeway lanes will be implemented along the westbound I-105 near Western Av for approximately 0.5 miles which includes the center inside lanes involving the HOV lane and one general purpose lane.
- Three lanes of traffic will remain open along the westbound I-105, and traffic control measures will be in place to guide motorists through the work area.
- Advance signage will be posted to notify motorists of upcoming lane closures.
- Metro C Line bus bridge will occur on Saturday, March 28, throughout the entire day between the Vermont/Athens and Hawthorne/Lennox C Line Stations.

#### Noteworthy:

- Construction is dynamic and schedules are subject to change.
